

## DIY: How to measure your infills fence space...

### Measurements (mm)

\_\_\_\_\_ A Top \_\_\_\_\_ B Bottom (W) Width  
 \_\_\_\_\_ C Right \_\_\_\_\_ D Left (H) Height

We will calculate the width of your panel from the smallest measurement.

### Infills Height Calculation

H (smallest) \_\_\_\_\_ - 25 mm = \_\_\_\_\_

We deduct 25 mm from the height to allow for differences in levels.

**Important Notes:** Check that your walls are level at the top, and that your left and right hand sides are plumb. If they are not contact us for further assistance.

Fax or email this sheet before placing your order and we will check and calculate your measurements for you.
